

Epic Technologies Customer Advocates to Introduce Managed IT Services to Small and Mid-Sized Businesses

Outsourcing the Management of Data Networks Enables Companies to Focus on Their Core Competencies

COOKEVILLE, NASHVILLE, KNOXVILLE — December 22, 2008 — Epic Technologies, an industry leader in business communications, announced today that the company's Customer Advocates will introduce managed IT services to the region's small to mid-sized businesses. By outsourcing the management of an organization's data network and infrastructure to Epic Technologies, they can focus all of their energy and resources on their core competency.

"Running an efficient network is not easy, especially with the convergence of voice and data," said Don Viar, managing partner of Epic Technologies. "Too often companies are caught up in day-to-day operations that mission-critical network maintenance and security management get overlooked. Unfortunately, most businesses do not have the resources to properly maintain, support, and keep their technology up to date. Managing the network is our core competency so it makes sense to outsource this important function to our team of industry experts."

Managed IT services was designed to assist companies in not only monitoring their network, IT infrastructure, and phone system but providing methods and tools for maximum utilization. Types of services include remote network monitoring and reporting 24 hours

a day, 7 days a week, firewall monitoring, intrusion detection, patch assessment and vulnerability scanning, preventative tasks, disaster recovery, data backup and regular performance analysis. Epic Technologies also offers help desk support on any issue an employee may face.

Outsourcing the support of a company's network has a number of unique benefits. First and foremost, Epic Technologies' experts in the field analyze the network to develop a complete game plan. Modeling and simulation tools assess current network traffic and evaluate the performance of desired enhancements and upgrades to determine the most appropriate solution before implementation. The end result is a custom designed system that supports future growth and change through flexible and scalable network environments. Epic Technologies is quickly becoming their customers' trusted advisor offering CIO level of advice to their businesses.

"It doesn't make economic sense for a business to incur the cost of adding full time in-house IT professionals with all of the loaded costs that come with it when this function can be outsourced saving thousands of dollars each year," added Mr. Viar. "We've developed a detailed communication plan that our Customer Advocates will execute so all of the businesses we serve are educated the value of our managed IT services offering. During this economic downturn

companies must evaluate the manner in which they conduct business and look for these types of solutions that have the power of increasing their profitability, while giving them a competitive advantage."

ABOUT EPIC TECHNOLOGIES

Epic Technologies is one of the leading providers of business communication solutions in the United States. Built upon a network of strategic relationships with clients and vendors, Epic has quickly grown to be a trusted business partner for complex voice, data, nurse call, and network infrastructure solutions. We build relationships as a trusted business partner with each of our clients and exceed their expectations, knowing that we will succeed when our partners succeed.
