Epic Technologies Stops Their Customers' Networks from Being Attacked

*Region's Leading Unified Communications
Provider Protects Their Customers'
Valuable Information with Robust
Solutions Designed to Safeguard Data
Networks*

COOKEVILLE, NASHVILLE,
KNOXVILLE — March 31, 2010 —
Attacks on an organization's data
network occur on a frequent basis.
This may come in the form of viruses,
spyware or phishing. Many small to
mid-sized businesses are missing the
necessary technology to properly
defend their critical information. As a
result, Epic Technologies is delivering
robust solutions such as email security,
web defense and off site data backup
applications that create a solid fortrance
to combat everyday threats.

"One of the easiest avenues to
penetrate a company's network is
through email," commented Don Viar,
Managing Partner of Epic
Technologies. "Unwanted email
continues to rise every year and as this
occurs the threat to the network
dramatically increases. The negative
effect includes decreased employee
productivity and downtime as well as
the monetary costs associated with
fixing the network if it's penetrated.
Therefore, we have introduced to our
customers a fully managed email
defense software that provides
perimeter-based security."

The intuitive solution offers a
variety of benefits including spam
blocking, virus and worm scanning,
and email attack and fraud protection.
The software also presents the network
administrator with a number user
friendly reports designed to aide in
making the necessary changes to
effectively deal with new threats. This
must have business application
manages, monitors and protects an

organization's email 24 hours a day, 7
days a week.

Additionally, Epic Technologies
offers a web defense solution that
proactively zeros in on spyware,
viruses and phishing attacks. Web
defense safeguards the entire network
including remote users and adapts to
the latest threats that occur. Companies
benefit immediately after its
implementation. For example, web
defense reduces unproductive web
surfing, network congestion, and
employee downtime. It protects
against vicious attacks and potential
fraud, lowers the risk of confidential
information leaks, identifies spyware-
infected computers, and increases web
visibility because it determines how
end users spend their time on the web.
However, the most important benefit is
that it eliminates the time spent by IT
professionals on threat management
and enables them to focus on achieving
strategic business objectives.

According to a survey conducted
by *Continuity Insights* magazine,
KPMG Risk Advisory Services, and
The Hartford's Guide to Emergency
Preparedness, more than 25% of all
businesses experience a significant
crisis in any given year – of those that
do not have a data recovery plan, 43%
will not re-open. The practice of
storing information, the heart and
lifblood of any organization, onto data
tapes locally and having someone take
them home for safekeeping is an
outdated and dangerous practice. Epic
Technologies provides an off site data
backup solution in the event the
network goes down. This tool
automatically and securely backs up all
of an organization's data directly to the
onsite appliance while simultaneously
backing up a copy to the offsite storage
application. This solution eliminates
the need to store and manage data

tapes, reduces the expensive hardware
needed to maintain those tapes, and
increases the recovery speed of lost
data.

"Advances in threat protection
have come to a point where it's
extremely cost effective for any
business to secure their most critical
asset. As our customers' trusted
technology advisor we strongly
encourage all organizations to take
advantage of these solutions because it
gives every business owner the peace
of mind that their network and
information are secure," commented
Mr. Viar.

ABOUT EPIC TECHNOLOGIES

Epic Technologies is one of the
leading providers of business
communication solutions in the United
States. Built upon a network of
strategic relationships with clients and
vendors, Epic has quickly grown to be
a trusted business partner for complex
voice, data, nurse call, and network
infrastructure solutions. We build
relationships as a trusted business
partner with each of our clients and
exceed their expectations, knowing
that we will succeed when our partners
succeed.

Epic knows how to empower
complex business needs through the
innovative use of technology to
maximize the return to the client's
bottom line. While we work in a wide
variety of industries and organizational
sizes, we have a particular expertise in
medium and larger sized organizations
with a particular emphasis on
healthcare, education, and service
oriented companies. Call us today
(866-525-EPIC) or visit us on the web
at www.epictn.com and let us show
you the Epic difference!
